- 8.2 The handicap system used to score individual placement of boats in a race is the Time-on-Time System. The Time Correction Factor (TCF) is multiplied to a boat's elapsed time to get their corrected time. The formula for TCF is: $TCF = 650 \text{ divided by } (550 + PHRF)$.
- 8.3 A boat's best scores for 70% of the races, rounded normally, will be used for the series scoring.
